Hazardous Area and ATEX directives

There are two Directives

- Directive 94/9/EC (ATEX 95) of the European Parliament and the Council of 23 March 1994 on the approximation of the laws of the Member States concerning equipment and protective systems intended for use in potentially explosive atmospheres.
- Directive 1999/92/EC (ATEX 137) of the European Parliament and the Council of 16 December 1999 on minimum requirements for improving the safety and health protection of workers potentially at risk from explosive atmospheres.

These two Directives are commonly called the Directives. is abbreviation from the French

mosph?res plosives. The Bulgarian Government published three ordinances which implement the Directives

- Ordinance ♦ I♦1971 of 29.10.2009 for civil-technical rules and norms for fire safety
- Ordinance, based on Directive 94/9/EC (ATEX 95) is Ordinance of the substantial requirements and assessment of conformity concerning equipment and protective systems intended for use in potentially explosive atmospheres.
